17TH EUREGIONAL WELTPP

Workshop on the Exploration of Low Temperature Plasma Physics

Welcome to the 17th *Workshop on the Exploration of Low Temperature Plasma Physics* (WELTPP-17). This workshop is intended for active scientists working in the field of low temperature plasma physics.

The aim of this workshop is to create a forum for young low temperature plasma scientists, that is graduate students and postdoctoral researchers, to meet, learn from each other, exchange knowledge, present results and establish new contacts. The emphasis is on the presentation of the work of the people new in this field.

The workshop is sponsored and organised by Eindhoven University of Technology (TU/e) and the Research Department "Plasmas with complex interactions" of the Ruhr-Universität Bochum in the framework of SFB-TR 87. WELTPP was born in close collaboration between the Eindhoven groups Plasma and Materials Processing (PMP) and Elementary Processes in Gas Discharges (EPG) and the Ruhr-Universität Bochum. Recently, York Plasma Institute and the Dutch Institute for Fundamental Energy Research (DIFFER) have joined the organising committee.

We wish you a fruitful and pleasant conference.

Jan Trieschmann (Ruhr-Universität Bochum)
Jan van Dijk (Eindhoven University of Technology)
Richard Engeln (Eindhoven University of Technology)
Stefan Welzel (FOM Institute DIFFER & Eindhoven University of Technology)
